

Module 2 – Process

Project Integration Management

Focuses on coordinating all project elements effectively, ensuring that project objectives align with organizational goals.

Scope and Schedule Management

Explores defining project scope, managing deliverables, and creating realistic timelines to keep projects on track.

Cost Management Techniques

Covers methods for estimating, budgeting, and controlling project costs to maintain financial efficiency.

Quality Assurance and Control

Introduces tools and practices to ensure project outcomes meet the desired quality standards and stakeholder expectations.

Risk Management Processes

Teaches how to identify, analyze, and mitigate potential project risks before they impact objectives.

Procurement and Resource Planning

Focuses on acquiring necessary resources and managing vendor relationships to ensure smooth project execution.

Monitoring and Controlling Project Work

Emphasizes tracking progress, managing changes, and maintaining performance throughout the project lifecycle.

Duration: 30 Hours

Cost: 140 USD
