

Module 3: Instructional Design & Digital Learning

Course Outlines

- **Fundamentals of instructional design**
- **Understanding learning theories and Bloom's Taxonomy**
- **The ADDIE framework: Analysis, Design, Development, Implementation, Evaluation**
- **Writing measurable learning objectives**
- **Designing engaging learning activities and assessments**
- **Integrating technology and e-learning tools**
- **Using Learning Management Systems (LMS) effectively**
- **Converting classroom content to digital formats**
- **Applying AI and analytics in modern learning environments**

Course Outcomes

By the end of this module, participants will be able to:

- Apply instructional design models to create structured learning programs
- Develop learner-centered training materials and assessments
- Design blended and digital learning experiences using LMS platforms
- Align learning objectives with measurable outcomes
- Integrate interactive tools and media to boost engagement
- Utilize analytics to evaluate and enhance learning effectiveness
